

Smedberg Kitchen

Category:
Residential

Location:
Seattle, WA

Designer:
Innovative Home
Renovations

Material Used:
Indian Black Palm
Plywood

Michael Smedberg, owner of the beautiful kitchen remodel, considered all materials carefully before selecting the Durapalm for his cabinets. He was looking for something truly unique, with warmth and depth to contrast with the other lighter elements in the design. Innovative Home Renovations (IHR) of Seattle, WA was selected to work with the Durapalm plywood and produce the vision. The work went smoothly and the result was a stunningly beautiful, one-of-a-kind installation.

Specifications

Possible LEED Credits:

- Low-Emitting Materials
- Bio-Based Materials

Physical / Mechanical Properties - PB-4872SG, Indian Black Palm Plywood

Dimensions:	3/4" x 48" x 72" (19mm x 1.22m x 1.85m)
Construction:	Indian black palm face and back, 100% bamboo core, cross-ply structure
Finish:	Provided unfinished
ASTM E84: Surface Burning	Class C
ASTM: 4442 : Moisture Content	6-9% average
ASTM-D5116 Small Chamber, Ultra-Low Emitting (ULEF)	ULEF (Ultra-Low Emitting Formaldehyde) Surpasses requirements under CARB II
