

Case Study

“Scarlett JoVansson”

Industry:
Adventure Van

Location:
Anywhere, North America

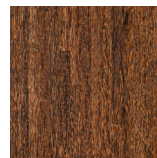

Designer/Builder:
Sandy Vans

The team at Sandy Vans is always on the lookout for unique yet lightweight materials for their high-end adventure van buildouts. The durapalm deco palm plywood stood out to them for several reasons. “The demand for the palm in the interior of our van builds is driven by a combination of factors, including sustainability, durability, and aesthetics,” said a representative at Sandy Vans. “We love that durapalm palm plywood is a sustainable and eco-friendly material, which is in line with our values as a company. The natural beauty and texture of durapalm also adds a unique touch, making it a hit with consumers.”

They continued, “the palm has a natural warmth and beauty that can enhance the look and feel of any space. We also appreciate the durability and resilience of the material, which is essential for the demanding environments that van conversions can be subjected to. As a company, we strive to use high-quality materials throughout our builds, and the palm fits the bill perfectly.”

Materials Used:

Sugar Deco
Palm Plywood

Physical / Mechanical Properties - Sugar Deco Palm Plywood

Dimensions	3/4" x 48" x 96"
Construction	3-ply assembly, palm front + back, 100% bamboo core
Moisture Content	6-9% average
Fire Rating	Class C
Finish	Unfinished
Organic Emissions	Meets or surpasses ULEF (ultra low emitting formaldehyde) standards under CARB II
