

Case Study: Hospitality

Thierry Chocolat

Category:
Hospitality

Location:
Vancouver, BC

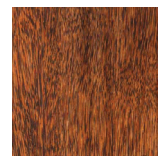

Design:
Bricault Design

Michelin-rated Thierry cafés feature warm, inviting interiors that showcase the delightful French confectionary creations of Chef Thierry Busset. The original store was created by Vancouver, BC based, multidisciplinary design firm, Bricault Design. Seen from the street, an oversized Durapalm palmwood door provides a grand entrance to an intimately scaled cafe space, which is enveloped in contoured Durapalm Tambour palmwood walls and natural stone floors.

Durapalm tabletops were custom fabricated for both Vancouver BC locations. "Durapalm provides a sensuously 'chocolaty' aesthetic, with Tambour paneling curving around the entire interior," Bricault said. "It's very attractive, and to date its durability has stood the test of time."

Materials Used:

Durapalm Plywood
PB-4872SG/PB-4896SG

Specifications

Possible LEED Credits:

Low-Emitting Materials +
Bio-Based Materials

Physical / Mechanical Properties - Palm Standard Grain Plywood

Dimensions:	3/4" x 48" x 72" or 96" (19mmx1.22mx1.83m or 2.438m)
Construction:	Three-ply , cross core constructions comprising Indian black palm front and back with Bamboo core
Hardness:	Average 1800 Janka Ball
ASTM E84: Surface Burning	Class C
ASTM: 4442 : Moisture Content	6-9% average
ASTM-D5116 Small Chamber, Ultra-Low Emitting (ULEF)	Ultra Low Emitting Formaldehyde (ULEF) Surpasses requirements under CARB II
